Autore	Kothe, Gottfried
Titolo	Topological vector spaces I / Gottfried Kothe ; translated by D. J. H. Garling
Pubbl/distr/stampa	Berlin : Springer-Verlag, 1969
ISBN	0387904409 (v.2)
Edizione	[[English ed.]]
Descrizione fisica	2 v. ; 24 cm.
Collana	Die Grundlehren der mathematischen Wissenschaften in Einzeldarstellungen mit besonderer Berücksichtigung der Anwendungsgebiete ; 159 Grundlehren der mathematischen Wissenschaften = A series of comprehensive studies in mathematics, 0072-7830 ; 237
Classificazione	AMS 46A
Altri autori (Persone)	Garling, D. J. H.
Disciplina	515.73
Soggetti	Topological linear spaces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	1. ed. orig. tedesca. - 1960. Si possiede la 2. edizione originale tedesca del 1966

Sommario/riassunto

Repetitive Motion Planning and Control of Redundant Robot Manipulators presents four typical motion planning schemes based on optimization techniques, including the fundamental RMP scheme and its extensions. These schemes are unified as quadratic programs (QPs), which are solved by neural networks or numerical algorithms. The RMP schemes are demonstrated effectively by the simulation results based on various robotic models; the experiments applying the fundamental RMP scheme to a physical robot manipulator are also presented. As the schemes and the corresponding solvers presented in the book have solved the non-repetitive motion problems existing in redundant robot manipulators, it is of particular use in applying theoretical research based on the quadratic program for redundant robot manipulators in industrial situations. This book will be a valuable reference work for engineers, researchers, advanced undergraduate and graduate students in robotics fields. Yunong Zhang is a professor at The School of Information Science and Technology, Sun Yat-sen University, Guangzhou, China; Zhijun Zhang is a research fellow working at the same institute.
