| Sommario/riassunto      | Addressing issues of feminism and representation, this book provides a                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

fresh and thorough consideration of the status and potential of Women's theatre today. The authors explore a range of different approaches to the languages of theatre, including translation and interpretation of the art form, along with languages, performance work, body language and gesture. Considered alongside the related social issues of race, class and dialect, the following questions emerge: What is the role of language in theatre today? Whose language is English; what other languages do women making theatre use?

| Sommario/riassunto      | The Magnesium Technology Symposium, which takes place every year at the TMS Annual Meeting & Exhibition, is one of the largest yearly gatherings of magnesium specialists in the world. Papers are presented in all aspects of the field, ranging from primary production to applications to recycling. Moreover, papers explore everything from basic research findings to industrialization. Magnesium Technology 2011 covers a broad spectrum of current topics, including alloys and their properties; cast products and processing; wrought products and processing; forming, joining, and machining; corrosion and surface finishing; ecology; and structural applications. In addition, you'll find coverage of new and emerging applications in such areas as biomedicine and hydrogen storage. |
