Sommario/riassunto	Depuis une dizaine d'années, les achats d'ouvrages de seconde main progressent de manière significative en France. Cette évolution résulte des changements d'habitudes des lecteurs-consommateurs, de plus en plus sensibles à l'économie circulaire, mais surtout de l'essor des plateformes numériques qui facilitent l'achat et la revente des livres d'occasion. L'ouvrage de Vincent Chabault, fruit d'une enquête de longue durée, explore ce marché et les multiples dynamiques qui le traversent aujourd'hui. Des bouquinistes aux plateformes, des puces de Saint-Ouen aux librairies de Paris et de Lyon en passant par les acteurs de l'économie sociale et solidaire et les transactions sur Leboncoin, il montre à quel point le processus de plateformisation bouscule les règles de l'échange et le savoir-faire des professionnels, de la constitution de l'assortiment aux opérations de formation des prix de revente. Au-delà du seul cas du livre, cet ouvrage permet en outre d'appréhender de nouveaux rapports de force apparus sur les places de marché virtuelles et, plus largement, un mouvement de fond qui

déstabilise l'ensemble des marchés de consommation et leur appareil commercial traditionnel.
