

1. Record Nr.	UNISALENTO991001755239707536
Autore	Pope, Martin, 1918-
Titolo	Electronic processes in organic crystals and polymers / Martin Pope and Charles E. Swenberg
Pubbl/distr/stampa	New York : Oxford University Press, 1999
ISBN	0195129636
Edizione	[2nd ed.]
Descrizione fisica	xxix, 1328 p. : ill. ; 24 cm
Collana	Monographs on the physics and chemistry of materials ; #56
Altri autori (Persone)	Swenberg, Charles E.
Disciplina	530.413
Soggetti	Molecular crystals Organic compounds Crystals - Electric properties Polymers - Electric properties
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Rev. ed. of: Electronic processes in organic crystals. 1982
Nota di bibliografia	Includes bibliographical references and indexes
Nota di contenuto	I. Optical Properties of Organic Molecules and Crystals -- II. Single Positive or Negative Carriers in Organic Crystals -- III. Production of Carrier Pairs in the Bulk -- IV. Photoemission from Organic Molecular Crystals -- V. Materials with High Dark Conductivity -- VI. Miscellaneous Systems -- VII. Electronic Processes in Polyacetylene (PA) -- VIII. Electronic Processes in Polydiacetylene (PDA) -- IX. Electronic Processes in Poly(p-Phenylene-Vinylene) (PPV) -- X. Electronic Processes in Polyaniline (PAni) -- XI. Electronic Processes in Polysilane (PS) -- XII. Electronic Processes in Fullerenes (C ₆₀) -- XIII. Carrier Generation and Recombination -- XIV. Carrier Transport -- XV. Space-Charge and Emission-Limited Currents -- XVI. Organic Magnets (OM) -- XVII. Superconductivity and other Collective States -- XVIII. Nonlinear Optical and Photorefractive Properties (NLO) -- XIX. Molecular Electronics -- XX. Applications.
