Sommario/riassunto	"Loss and grief are an inherent part of chronic illness. But while much has been written on grief associated with death and dying, the grief and losses accompanying chronic illness have received relatively little scholarly attention. In this book, Ranjan Roy addresses the complex issues related to loss among those with chronic illness." "In Chronic

Pain, Loss, and Suffering, Roy evaluates the current state of knowledge through an examination of contemporary literature and clinical application. He presents a series of comprehensive case studies, which together indicate that the key challenge for many patients is loss of self-esteem and control. The chapters deal with a range of losses such as job loss, declining ability to function, loss of family and sexual role, old age and its related losses, and suicide. Through discussion of the struggles and successes that chronically ill patients encounter in their journey, this work will assist clinicians in helping patients come to terms with the difficulties they face and to establish a renewed sense of self."--Jacket

Sommario/riassunto

Ranging from the imperial palaces of ancient China and the bakeries of fourteenth-century Genoa and Naples all the way to the restaurant kitchens of today, Pasta tells a story that will forever change the way you look at your next plate of vermicelli. Pasta has become a ubiquitous food, present in regional diets around the world and available in a host of shapes, sizes, textures, and tastes. Yet, although it has become a mass-produced commodity, it remains uniquely adaptable to innumerable recipes and individual creativity. *Pasta: The Story of a Universal Food* shows that this enormously popular food has resulted from a lengthy process of cultural construction and widely diverse knowledge, skills, and techniques. Many myths are intertwined with the history of pasta, particularly the idea that Marco Polo brought pasta back from China and introduced it to Europe. That story, concocted in the early twentieth century by the trade magazine *Macaroni Journal*, is just one of many fictions unmasked here. The true homelands of pasta have been China and Italy. Each gave rise to different but complementary culinary traditions that have spread throughout the world. From China has come pasta made with soft wheat flour, often served in broth with fresh vegetables, finely sliced meat, or chunks of fish or shellfish. *Pastasciutta*, the Italian style of pasta, is generally made with durum wheat semolina and presented in thick, tomato-based sauces. The history of these traditions, told here in fascinating detail, is interwoven with the legacies of expanding and contracting empires, the growth of mercantilist guilds and mass industrialization, and the rise of food as an art form. Whether you are interested in the origins of lasagna, the strange genesis of the Chinese pasta bing or the mystique of the most magnificent pasta of all, the timballo, this is the book for you. So dig in!
