Sommario/riassunto	All students of the past bump into what seem to be impenetrable walls and are left looking longingly beyond the barrier for the lore that seems hopelessly lost. This book is an argument that all that information is not necessarily lost. It may just need a different approach-perhaps multidisciplinary, perhaps a new method, or maybe just with a new hypothesis for testing. Vanished societies have left behind masses of raw data, but it is up to us to discover new ways to look through these windows into the past. Especially in light of the growing relationship-and tensi

Sommario/riassunto

The two volumes LNCS 5863 and 5864 constitute the proceedings of the 16th International Conference on Neural Information Processing, ICONIP 2009, held in Bangkok, Thailand, in December 2009. The 145 regular session papers and 53 special session papers presented were carefully reviewed and selected from 466 submissions. The papers are structured in topical sections on cognitive science and computational neuroscience, neurodynamics, mathematical modeling and analysis, kernel and related methods, learning algorithms, pattern analysis, face analysis and processing, image processing, financial applications, computer vision, control and robotics, evolutionary computation, other emerging computational methods, signal, data and text processing, artificial spiking neural systems: nonlinear dynamics and engineering applications, towards brain-inspired systems, computational advances in bioinformatics, data mining for cybersecurity, evolutionary neural networks: theory and practice, hybrid and adaptive systems for computer vision and robot control, intelligent data mining, neural networks for data mining, and SOM and related subjects and its applications.
