1. Record Nr. UNISALENTO991001918589707536

Autore	De Foe, Daniel
Titolo	Le avventure del colonnello Jack / Daniel De Foe ; a cura di Paolo Amalfitano ; traduzione di Nemi D'Agostino
Pubbl/distr/stampa	Napoli : A. Guida, 1983
Descrizione fisica	310 p. ; 21 cm.
Altri autori (Persone)	D'Agostino, Nemi
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNINA9910483058103321

Titolo	Pattern recognition in bioinformatics : third IAPR international conference, PRIB 2008, Melbourne, Australia, October 15-17, 2008 : proceedings / / Madhu Chetty, Alioune Ngom, Shandar Ahmad (eds.)
Pubbl/distr/stampa	Berlin, : Springer, 2008
ISBN	3-540-88436-X
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (XVI, 472 p.)
Collana	LNCS sublibrary. SL 8, Bioinformatics Lecture notes in bioinformatics, , 0302-9743 ; ; 5265
Altri autori (Persone)	ChettyMadhu NgomAlioune AhmadShandar
Disciplina	570.285
Soggetti	Bioinformatics Computational biology Computer vision in medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Protein : structure, function, and interaction -- pt. 2. Learning,

	classification, and clustering -- pt. 3. Bio-molecular networks and pathways analysis -- pt. 4. Microarray and gene expression analysis -- pt. 5. Data mining and knowledge discovery -- pt. 6. Applications of high performance computing.
Sommario/riassunto	This book constitutes the refereed proceedings of the International Workshop on Pattern Recognition in Bioinformatics, PRIB 2008, held in Melbourne, Australia, in October 2008. The 39 revised full papers presented were carefully reviewed and selected from 121 submissions. The papers discuss the applications of pattern recognition methods in the field of bioinformatics to solve problems in life sciences. The papers are organized in 6 topical parts on protein: structure, function and interaction; learning, classification and clustering; bio-molecular networks and pathways analysis; microarray and gene expression analysis; data mining and knowledge discovery; applications of high performance computing.
