Thoracic outlet syndrome -- 19. Superficial thrombophlebitis and deep vein thrombosis -- 20. Pulmonary embolism -- 21. Chronic venous disease and venous ulcers -- 22. Diabetic foot management -- 23. Lymphedema -- 24. Vascular Trauma -- 25. Amputation.

## Sommario/riassunto

The official publication of the Society for Vascular Nursing, the newly updated Core Curriculum for Vascular Nursing provides core vascular nursing information essential to new and experienced practitioners alike. Presented in a quick-reference outline, the evidence-based content addresses a wide range of vascular conditions, as well as diagnostics, vascular anatomy, surgical interventions, medications, and patient education. Whether you are prepping for the certification exam, involved in continuing education, or treating a challenging patient condition, this is an unbeatable resource.Feature

Sommario/riassunto

Child obesity is a serious condition that affects children around the world in growing numbers. With obesity comes an increased risk of other chronic diseases as well, making it even more important to understand and treat this condition from a variety of angles. This current volume seeks to understand the phenomenon of child obesity and presents a range of viewpoints on its prevalence, causes, and treatments. The different sections contained within explore the following topics: The worldwide prevalence of childhood obesity and its growing effect on children The causes of childhood obesity and
