Sommario/riassunto

This book presents a unique, multi-faceted investigation of the language abilities of three older adopted Romanian orphans who experienced extreme deprivation in their early years. Serena, Gabrielle and Ingrid were aged 7 years, 6 years and nearly 4 years, respectively, when rescued by UK families from the orphanages where they were placed at or around their birth. In these institutions, an absence of social and psychological stimulation, nutritious food and physical exercise had left them completely dependent on care staff for their most basic needs, and effectively without language. The book
