Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (239 p.)
Collana	China Insights, , 2363-7579
Disciplina	338.927
Soggetti	Social sciences Sustainable development Social Sciences, general Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Fragile Ecology and Dream of beautiful China -- Procession and Challenge of Industrialization -- Characteristic and Goal of Urbanization -- Demand for Resources and the Environment of World Factory -- Security Association of Natural Resources -- Practice of Ecological Civilization -- Performance and Challenges of Green Carbon -- Outlook of Ecological China.
Sommario/riassunto	This book looks into the increasing conflict between the demand of economic growth and the already fragile ecological system condition in China. The prolonged urbanization process has escalated the erosion of natural environments and is increasing energy consumption. China's role as a "world plant" is also demanding more and more resource supply as well as energy consumption. This book argues that to correctly respond to these emerging issues, apart from upgrading industry and improves environmental protection techniques, China needs to establish an "ecological civilization" that provides an ideological basis for the construction of a green low-carbon model of economic growth.
