	Titolo	Peri-Urban Areas and Food-Energy-Water Nexus : Sustainability and Resilience Strategies in the Age of Climate Change // edited by Angela Colucci, Marcello Magoni, Scira Menoni
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
	ISBN	3-319-41022-9
	Edizione	[1st ed. 2017.]
	Descrizione fisica	1 online resource (ix, 156 p.) : ill
	Collana	Springer Tracts in Civil Engineering , , 2366-259X
	Classificazione	52.08.04
	Disciplina	307.116
	Soggetti	Renewable energy resources Climatic changes Environmental management Natural disasters Renewable and Green Energy Climate Change/Climate Change Impacts Water Policy/Water Governance/Water Management Natural Hazards

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Climate policies and strategies in the European Union -- Nexus approach to Disaster Risk Reduction, Climate Adaptation and Ecosystem Management: new paths for a Sustainable and Resilient Urban Development -- Function and values of peri-urban areas: a multifunctional perspective from the EU to Lombardy Region policies -- Urban-rural partnerships and governance of peri-urban areas in a European perspective. Towards regenerative regions -- Qualifying decision-making through strategic environmental assessment: advancing the resilience of peri-urban areas -- Services, values and functions of peri-urban areas in a NEXUS approach -- NEXUS services from a territorial perspective: interactions and trade-offs -- Flood risk management and the nexus approach: a preliminary conceptual overview based on case studies -- NEXUS and disaster prevention: what can we learn from the Genevan urban area? -- Renaturalizing riverbanks and making space for the river: coupling ecological concerns and risk prevention measures -- Exploring the water-food-energy and climate nexus: insights from the Moroccan Draa Valley -- Peri-urban/peri-rural areas: identities, values and strategies -- Local food chain: multi-stakeholders policies in Dutch and European policies -- Urban-rural partnerships in peri-urban areas: the non-profit association role -- Between city and countryside: changing nexus in the urban phenomenon of Rome -- Energy flows in peri-urban areas -- Rethinking energies in peri-urban areas: potentiality and action criteria -- Strategies to reduce the use of fossil fuels in the Lombardy Region -- Bioregion and Eco-Efficiency. .
Sommario/riassunto	This book explores the nexus among food, energy and water in peri-urban areas, demonstrating how relevant this nexus is for environmental sustainability. In particular it examines the effective management of the nexus in the face of the risks and trade-offs of mitigation policies, and as a mean to create resilience to climate change. The book delineates strategies and actions necessary to develop and protect our natural resources and improve the functionality of the nexus, such as: integrated management of the major resources that characterize the metabolism of a city, stronger coordination among stakeholders who often weight differently the services that are relevant to their individual concerns, integration of efforts towards environmental protection, adaptation to and prevention of climate change and disaster risks mitigation.
