Sommario/riassunto	From "an eye for an eye" to debates over capital punishment, humanity has a long and controversial relationship with doling out justice for criminal acts. Today, crime and punishment remain significant parts of our culture, but societies vary greatly on what is considered criminal and how it should be punished. In this global survey of crime and punishment throughout history, Mitchel P. Roth examines how and why we penalize certain activities, and he scrutinizes the effectiveness of

such efforts in both punishing wrongdoers and bringing a sense of justice to victims.

Sommario/riassunto

Too often, however, companies lack detailed processes for finding and consulting with experts—making it hard to match the required know-how with the project at hand. In *Expert Judgment in Project Management: Narrowing the Theory-Practice Gap*, Paul S. Szwed provides research that will help project managers become more adept at using expert judgment effectively. The author explores the use of expertise in several sectors, including engineering, environmental management, medicine, political science, and space exploration. He then looks at the informal state of expert judgment and its underutilization in the management of projects. Szwed's critical recommendations can help project managers improve the way they select, train, and work with experts to increase the odds of any project's success.
