

1. Record Nr.	UNISALENT0991002254069707536
Autore	Post, Werner
Titolo	Che cos'e il materialismo? / Werner Post, Alfred Schmidt
Pubbl/distr/stampa	Roma ; Bari : Laterza, 1976
Descrizione fisica	VII, 91 p. ; 18 cm.
Collana	Saggi tascabili Laterza ; 27
Altri autori (Persone)	Schmidt, Alfredauthor
Disciplina	146.3
Soggetti	Materialismo
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Tit. orig.: Was ist Materialismus?
2. Record Nr.	UNINA9910437772203321
Titolo	Business process management : theory and applications / / Michael Glykas (ed.)
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, c2013
ISBN	9783642284090 3642284094
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (XXV, 459 p.)
Collana	Studies in computational intelligence, , 1860-949X ; ; 444
Altri autori (Persone)	GlykasMichael
Disciplina	650.0285
Soggetti	Business - Data processing Management information systems Workflow - Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and author index.

Sommario/riassunto

Business Process Management (BPM) has been in existence for decades. It uses, complements, integrates and extends theories, methods and tools from other scientific disciplines like: strategic management, information technology, managerial accounting, operations management etc. During this period the main focus themes of researchers and professionals in BPM were: business process modeling, business process analysis, activity based costing, business process simulation, performance measurement, workflow management, the link between information technology and BPM for process automation etc. More recently the focus moved to subjects like Knowledge Management, Enterprise Resource Planning (ERP) Systems, Service Oriented Architectures (SOAs), Process Intelligence (PI) and even Social Networks. In this collection of papers we present a review of the work and the outcomes achieved in the classic BPM fields as well as a deeper insight on recent advances in BPM. We present a review of business process modeling and analysis and we elaborate on issues like business process quality and process performance measurement as well as their link to all other organizational aspects like human resources management, strategy, information technology (being SOA, PI or ERP), other managerial systems, job descriptions etc. We also present recent advances to BPR tools with special focus on information technology, workflow, business process modeling and human resources management tools. Other chapters elaborate on the aspect of business process and organizational costing and their relationship to business process analysis, organizational change and reorganization. In the final chapters we present some new approaches that use fuzzy cognitive maps and a recently developed software tool for scenario creation and simulation in strategic management, business process management, performance measurement and social networking. The audience of this book is quite wide. The first chapters can be read by professionals, academics and students who want to get some basic insight into the BPM field whereas the remaining present more elaborate and state of the art concepts methodologies and tools for an audience of a more advanced level. .
