Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Basic aspects -- section 2. Acquired ataxias -- section 3. Degenerative ataxias -- section 4. Degenerative ataxias :

mitochondrial, autosomal, recessive and x-linked -- section 5.
Degenerative ataxias : autosomal dominant -- section 6. Other issues.

Sommario/riassunto

This volume's primary goal is to provide a comprehensive understanding of recent developments and advancements in the study of ataxic disorders. Beginning with an examination of the cerebellar region, and then progressing to a fresh perspective on the clinical aspects of the various forms of ataxia, this handbook gives clinicians a state-of-the-art reference for the management of the many etiologies and neurological manifestations of ataxic disorders. Clinicians will gain a broader understanding of generative ataxias and the genetic disorders associated with them. In addition, new n

Sommario/riassunto

Inuit hunting traditions are rich in perceptions, practices and stories relating to animals and human beings. Laugrand and Oosten examine key figures such as the raven, an animal that has a central place in Inuit culture as a creator and a trickster, and qupirruit, a category consisting of insects and other small life forms. After these non-social and inedible animals, the authors discuss the dog, the companion of the hunter, and the fellow hunter, the bear, considered to resemble a human being. A discussion of the renewal of whale hunting accompanies the chapters about animals considered ""p
