

1.	Record Nr.	UNISALENTO991002382199707536
	Autore	Scatigna Minghetti, Gaetano
	Titolo	Oronzo Suma : profilo biografico / Gaetano Scatigna Minghetti
	Pubbl/distr/stampa	Fasano : Grafischena, 1972
	Descrizione fisica	71 p., [1] c. di tav. : ill. ; 19 cm
	Disciplina	921
	Soggetti	Suma, Oronzo - Biografia
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910830382803321
	Titolo	Neural transplantation in neurodegenerative disease [[electronic resource]] : current status and new directions / / [editors Derek J. Chadwick and Jamie A. Goode]
	Pubbl/distr/stampa	Chichester ; ; New York, : Wiley, 2000
	ISBN	1-280-27263-5 9786610272631 0-470-66829-6 0-470-87082-6 0-470-87083-4
	Descrizione fisica	1 online resource (335 p.)
	Collana	Novartis Foundation symposium ; ; 231
	Altri autori (Persone)	ChadwickDerek GoodeJamie
	Disciplina	617.4/80592 617.4810952
	Soggetti	Nerve tissue - Transplantation Central nervous system - Transplantation Nervous system - Degeneration
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	<p>NEURAL TRANSPLANTATION IN NEURODEGENERATIVE DISEASE: CURRENT STATUS AND NEW DIRECTIONS; Contents; Participants; Introduction; Cell replacement strategies for neurodegenerative disorders; Discussion; Functional analysis of fronto-striatal reconstruction by striatal grafts; Discussion; Functional reconstruction of the hippocampus: fetal versus conditionally immortal neuroepithelial stem cell grafts; Discussion; Gene transfer for neuroprotection in animal models of Parkinson's disease and amyotrophic lateral sclerosis; Discussion</p> <p>Repair of corticospinal axons by transplantation of olfactory ensheathing cellsDiscussion; Neural transplantation in Parkinson's disease; Discussion; Transplantation of human fetal striatal tissue in Huntington's disease: rationale for clinical studies; Discussion; General discussion I Prospects for fetal transplants; Neurotransplantation in neurodegenerative disease: a survey of relevant issues in developmental neurobiology; Discussion; Molecular and cellular mechanisms in immune rejection of intracerebral neural transplants; Discussion; Porcine neural xenografts: what are the issues? DiscussionGene transfer techniques for the delivery of GDNF in Parkinson's disease; Discussion; Neurogenesis in the adult hippocampus; Discussion; Neural stem cells are uniquely suited for cell replacement and gene therapy in the CNS; Discussion; Functional repair with neural stem cells; Discussion; Remyelinating the demyelinated CNS; Discussion; General discussion II The ES cell approach; Final discussion The future for fetal grafts; Stem cell strategies; Index of contributors; Subject index</p>
Sommario/riassunto	<p>The field of neural transplantation is at a crucial stage, with important clinical trials on transplantation in patients with Parkinson's disease nearing completion and novel, alternative approaches to fetal transplantation being developed. This timely book brings together leading neuroscientists, clinicians, and cell and developmental biologists to discuss the use of neural transplants in neurodegenerative disorders, such as Parkinson's disease, Huntington's chorea, amyotrophic lateral sclerosis, multiple sclerosis and spinal cord injury. There is also extensive coverage of the potential a</p>
