Sommario/riassunto	This book adopts a concise approach to the topic of bone metastasis management. It provides summarized information and updated references on the different aspects of metastasization, medical treatment, radiotherapy, surgical treatments and the newer palliative options. As such, the book does not presume to be comprehensive but instead offers an update on the newer concepts and treatments. The editors have gathered together a team of excellent authors to address the different aspects and concepts and to provide a unique

Sommario/riassunto	Schools are under more pressure than ever before to provide a good education for pupils with special needs. Revisiting the fifty schools that they researched for their 1985 ground-breaking study, One in Five, Paul Croll and Diana Moses provide an authoritative guide to the central issues of children with special needs. The authors also consider the provision for various special needs, including emotional and behavioral difficulties, ADD, Aspergers Syndrome, autism, and dyslexia. Based on research
