Nota di bibliografia

Includes bibliographical references (p. [313]-372) and index.

Nota di contenuto

1. The Unfinished Semantic Agenda of Naming and Necessity -- 2. Rigid Designation and Its Lessons for the Semantic Contents of Proper Names -- 3. The Meaning of Names -- 4. Ambiguity and Indexicality -- 5. Partially Descriptive Names -- 6. The Problem Posed by Propositional Attitude Ascriptions -- 7. The Case Against Linguistically Enhanced Propositions -- 8. Millian Meaning and Pseudo-Fregean Attitudes -- 9. What Is It for a General Term to Be a Rigid Designator? -- 10. What Do Natural Kind Predicates Have in Common with Proper Names? -- 11. Natural Kind Predicates, Mass Nouns, and Abstract Singular Terms.

Sommario/riassunto

Soames introduces a new conception of the relationship between linguistic meaning and assertions made by utterances. He gives meanings of proper names and natural-kind predicates and explains their use in attitude ascriptions.
