Sommario/riassunto	The 1991 film 'The Silence of the Lambs', based on Thomas Harris's bestseller, was a game-changer in the fields of both horror and crime cinema. FBI trainee Clarice Starling was a new kind of heroine, vulnerable, intuitive, and in a deeply unhealthy relationship with her monstrous helper/opponent, the serial killer Hannibal Lecter. Jonathan Demme's film skillfully appropriated the tropes of police procedural, gothic melodrama and contemporary horror to produce something entirely new. The resulting film was both critically acclaimed and massively popular, and went on to have an enormous influence on 1990s genre cinema. This book closely examines the factors that contributed to the film's impact, including the revelatory performances of Jodie Foster and Anthony Hopkins in the lead roles.

Sommario/riassunto	There's a scene in Lewis Carroll's <i>Through the Looking Glass</i> in which the Red Queen, having just led a chase with Alice in which neither seems to have moved from the spot where they began, explains to the perplexed girl: "It takes all the running you can do, to keep in the same place." Evolutionary biologists have used this scene to illustrate the evolutionary arms race among competing species. William Barnett argues that a similar dynamic is at work when organizations compete, shaping how firms and industries evolve over time. Barnett examines the effects--and unforeseen perils--of competing and winning. He takes a fascinating, in-depth look at two of the most competitive industries--computer manufacturing and commercial banking--and

derives some startling conclusions. Organizations that survive competition become stronger competitors--but only in the market contexts in which they succeed. Barnett shows how managers may think their experience will help them thrive in new markets and conditions, when in fact the opposite is likely to be the case. He finds that an organization's competitiveness at any given moment hinges on the organization's historical experience. Through Red Queen competition, weaker competitors fail, or they learn and adapt. This in turn heightens the intensity of competition and further strengthens survivors in an ever-evolving dynamic. Written by a leading organizational theorist, *The Red Queen among Organizations* challenges the prevailing wisdom about competition, revealing it to be a force that can make--and break--even the most successful organization.
