3. Record Nr.	UNINA9910298294203321
Autore	Abbasi Arshad Mehmood
Titolo	Wild Edible Vegetables of Lesser Himalayas : Ethnobotanical and Nutraceutical Aspects, Volume 1 // by Arshad Mehmood Abbasi, Munir Hussain Shah, Mir Ajab Khan
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-09543-9
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (372 p.)
Disciplina	570 571.2 571.32 577
Soggetti	Botany Plant physiology Biodiversity Plants Plant anatomy Plants - Development Plant ecology Plant Sciences Plant Physiology Plant Systematics/Taxonomy/Biogeography Plant Anatomy/Development Plant Ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Pakistan and Pakistani Himalayas -- Ethnobotany and Ethnomedicine -- Phytochemicals and Nutraceuticals -- Ethnobotanical Aspects of Wild Edible Vegetables -- Nutritional Contents of Wild Edible Vegetables -- Metal Levels in Wile Edible Vegetables -- Phytochemical Contents of Wild Edible Vegetables -- Antioxidant Properties of Wild Edible

## Vegetables. .

### Sommario/riassunto

Our intention with this book was to present the reader with the most accurate, significant, and up-to-date background and knowledge in the areas of ethnomedicinal and nutraceutical vegetation for the Lesser Himalayas in a comprehensive text. Wild Edible Vegetables of Lesser Himalayas provides a complete review of over 50 important plants of this region and details each species including photographs, botanical name, local name, family, flowering and fruiting period, status and habitat, parts used, distribution, ethnobotanical uses, cultural aspects, medicinal uses, and nutraceutical aspects. Medicinal uses include mode of preparation, method of application and diseases studied; cultural aspects and index; nutraceutical data provides analysis of fats, proteins, fibers, carbohydrates, ash, moisture content, dry matter, and energy value; elemental analysis includes various essential and toxic metals; phytochemical screening includes total phenolics, flavonoids, flavonols and ascorbic acid, and antioxidant potential in terms of DPPH scavenging activity, hydroxyl radical scavenging activity, H<sub>2</sub>O<sub>2</sub> scavenging activity, Fe<sup>2+</sup> chelating activity, ferric reducing antioxidant power, and phosphomolybdenum assay for each species. Wild Edible Vegetables of Lesser Himalayas is a concise and handy guide for scientists, scholars, and students interested in the study of agriculture, food science, nutraceutical science, bioscience, biodiversity, applied ethnobotany, ethnoecology, and ecology. .
