Sommario/riassunto

The fundamental task facing students of cultural studies is the application of theory into critical practice, and this book offers its readers the conceptual tools to practice cultural analysis for themselves. It includes pedagogical features, such as dialogues, graphs, images, and recommended readings.

Nota di contenuto	Invited Talk -- Usage Control, Risk and Trust -- Prevention Systems -- Attacking Image Recognition Captchas -- An Insider Threat Prediction Model -- A Call Conference Room Interception Attack and Its Detection

-- Safe and Efficient Strategies for Updating Firewall Policies -- Privacy I -- A Privacy-Preserving Architecture for the Semantic Web Based on Tag Suppression -- Context-Aware Privacy Design Pattern Selection -- Real-Time Remote Attestation with Privacy Protection -- Private Searching on MapReduce -- Privacy II -- In Search of Search Privacy -- Untraceability and Profiling Are Not Mutually Exclusive -- Privacy Policy Referencing -- Access Control -- Formal Proof of Cooperativeness in a Multi-Party P2P Content Authentication Protocol -- Extending XACML Access Control Architecture for Allowing Preference-Based Authorisation -- An Agent Based Back-End RFID Tag Management System -- Security and Trust Concepts -- Assessing the Usability of End-User Security Software -- Building ISMS through the Reuse of Knowledge -- Mechanizing Social Trust-Aware Recommenders with T-Index Augmented Trustworthiness -- Security for Dynamic Collaborations -- Security for Dynamic Service-Oriented eCollaboration -- Analyzing Information Security Awareness through Networks of Association -- Efficiency Improvement of Homomorphic E-Auction.

Sommario/riassunto

This book presents the proceedings of the 7th International Conference on Trust, Privacy and Security in Digital Business (TrustBus 2010), held in Bilbao, Spain during August 30–31, 2010. The conference continued from previous events held in Zaragoza (2004), Copenhagen (2005), Krakow (2006), Regensburg (2007), Turin (2008) and Linz (2009). The recent advances in information and communication technologies (ICT) have raised new opportunities for the implementation of novel applications and the provision of high-quality services over global networks. The aim is to utilize this ‘information society era’ for improving the quality of life for all citizens, disseminating knowledge, strengthening social cohesion, generating earnings and finally ensuring that organizations and public bodies remain competitive in the global electronic marketplace. Unfortunately, such a rapid technological evolution cannot be problem-free. Concerns are raised regarding the ‘lack of trust’ in electronic procedures and the extent to which ‘information security’ and ‘user privacy’ can be ensured. TrustBus 2010 brought together academic researchers and industry developers, who discussed the state of the art in technology for establishing trust, privacy and security in digital business. We thank the attendees for coming to Bilbao to participate and debate the new emerging advances in this area.
