Sommario/riassunto

In this collection of papers by Laird Addis, published over approximately a quarter century, the main topics are the ontology of mind and the role of mind in the explanation of behavior. Addis defends a theory of natural signs, by which there is, in every conscious state including emotional states, an intrinsically intentional entity. He also argues that explanations of behavior by dispositional mental states, while not themselves causal explanations, presuppose the possibility of such explanations. The theory of dispositions is applied also to the theories of Chomsky and Freud. In broad stroke
