

1. Record Nr.	UNISALENTO991003152359707536
Autore	Öffentliche Sammlungen <Zurigo>
Titolo	Zürich, Öffentliche Sammlungen / von Hans Peter Isler
Pubbl/distr/stampa	Bern : H. Lang, 1973
Descrizione fisica	1 v. : ill. ; 34 cm
Collana	Corpus vasorum antiquorum. Schweiz ; 2
Altri autori (Persone)	Isler, Hans Peterauthor
Altri autori (Enti)	Union académique internationale
Disciplina	708
Soggetti	Vasi antichi - Svizzera - Zurigo - Öffentliche Sammlungen - Cataloghi
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	In testa al front.: Union académique internationale

2. Record Nr.	UNINA9910300551203321
Titolo	4th International Symposium of Space Optical Instruments and Applications : Delft, The Netherlands, October 16 -18, 2017 // edited by H. Paul Urbach, Qifeng Yu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-96707-X
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (284 pages)
Collana	Springer Proceedings in Physics, , 1867-4941 ; ; 209
Disciplina	522.2
Soggetti	Lasers Astronomy - Observations Geographic information systems Aerospace engineering Astronautics Laser Astronomy, Observations and Techniques Geographical Information System Aerospace Technology and Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Space optical remote sensing system design -- Advanced optical system design -- Remote sensor calibration and measurement -- Remote sensing data processing and information extraction -- Remote sensing data applications. .
Sommario/riassunto	This book gathers selected and expanded contributions presented at the 4th Symposium on Space Optical Instruments and Applications, which was held in Delft, the Netherlands, on October 16–18, 2017. This conference series is organized by the Sino-Holland Space Optical Instruments Laboratory, a cooperative platform between China and the Netherlands. The symposium focused on key technological problems regarding optical instruments and their applications in a space context. It covered the latest developments, experiments and results on the theory, instrumentation and applications of space optics. The book is

split into five main sections: The first covers optical remote sensing system design, the second focuses on advanced optical system design, and the third addresses remote sensor calibration and measurement. Remote sensing data processing and information extraction are then presented, followed by a final section on remote sensing data applications.
