Sommario/riassunto	More than two billion people worldwide have currently no access to grid electricity or other efficient energy supply. This is one third of humanity and the majority live in rural areas. The productivity and health of these people are diminished by reliance on traditional fuels and technologies, with women and children suffering most. Energy is the key element to empower people and ensure water, food and fodder supply as well as rural development. Therefore access to energy should be treated as the fundamental right to everybody. Renewable energy has the potential to bring power, not only in the literal sense, to communities by transforming their prospects. This book offers options that meet the needs of people and communities for energy and engage them in identifying and planning their own provision. It describes updated renewable energy technologies and offers strategies and guidelines for the planning and implementation of sustainable energy supply for individuals and communities

Sommario/riassunto	In medieval and early modern Europe, the use of charms was a living practice in all strata of society. The essays in this latest CEU Press publication explore the rich textual tradition of archives, monasteries, and literary sources. The author also discusses texts amassed in folklore archives and ones that are still accessible through field work in many rural areas of Europe.
