Autore	Douglas, James
Titolo	Building adaptation [e-book] / James Douglas
Pubbl/distr/stampa	Amsterdam ; Boston ; London : Butterworth-Heinemann, 2006
ISBN	9780750666671 0750666676
Edizione	[2nd ed.]
Descrizione fisica	xxii, 651 p. : ill. ; 25 cm
Disciplina	690.24
Soggetti	Buildings - Remodeling for other use Buildings - Repair and reconstruction Electronic books.
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (p. [595]-641) and index
Nota di contenuto	Introduction; Feasibility; Principles of Building Conversion; Adaptive fuses; Lateral extensions; Vertical extensions; Structural alterations; Principles of refurbishment; Further aspects of refurbishment; Sustainable adaptation; Implementation; Appendices
Sommario/riassunto	As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. Building Adaptation, Second Edition is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques, and processes needed when existing buildings must undergo alteration, conversion, extension, improvement, or refurbishment. The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the

adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance. \* A core text for building surveying students and undergraduate and postgraduate built environment courses \* Revised and updated throughout, in particular on the characteristics of buildings and their refurbishment potential. \* Includes numerous illustrations and examples that focus on a wide variety of different building types
