| Autore | Welch, Kimo M. |
| Titolo | Capture pumping technology [e-book] / Kimo Welch |
| Pubbl/distr/stampa | Amsterdam ; New York : Elsevier, 2001 |
| ISBN | 9780444508829 0444508821 |
| Edizione | [2nd fully rev. ed.] |
| Descrizione fisica | xiv, 361 p. : ill. ; 25 cm |
| Disciplina | 621.69 |
| Soggetti | Pumping machinery Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Risorsa elettronica |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references and indexes |
| Sommario/riassunto | This is a practical textbook written for use by engineers, scientists and technicians. It is not intended to be a rigorous scientific treatment of the subject material, as this would fill several volumes. Rather, it introduces the reader to the fundamentals of the subject material, and provides sufficient references for an in-depth study of the subject by the interested technologist. The author has a lifetime teaching credential in the California Community College System. Also, he has |

taught technical courses with the American Vacuum Society for about 35 years. Students attending many of these classes have backgrounds varying from high-school graduates to Ph.D.s in technical disciplines. This is an extremely difficult class profile to teach. This book still endeavors to reach this same audience. Basic algebra is required to master most of the material. But, the calculus is used in derivation of some of the equations. The author risks use of the first person <IT>I</IT>, instead of <IT>the author</IT>, and <IT>you</IT> instead of <IT>the reader</IT>. Both are thought to be in poor taste when writing for publication in the scientific community. However, <IT>I</IT> am writing this book for <IT>you</IT> because the subject is exciting, and I enjoy teaching you, perhaps, something new. The book is written more in the vein of a <IT>one-on-one</IT> discussion with you, rather than the author lecturing to the reader. There are anecdotes, and examples of some failures and successes I have had over the last forty-five years in vacuum related activities, I'll try not to understate either. Lastly, there are a few equations which if memorised will help you as a vacuum technician. There are less than a dozen equations and half that many <IT>rules of thumb</IT> to memorize, which will be drawn on time an again in designing, operating and trouble-shooting any vacuum system

| 3. Record Nr. | UNINA9910148815803321 |
| Autore | Harlem O.K |
| Titolo | Communication in Medicine: a Challenge to the Profession // O.K. Harlem |
| Pubbl/distr/stampa | Basel : , : S. Karger, , 1977 |
| ISBN | 9783318044331 3318044334 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (XII + 108 pages) : : 14 figures |
| Disciplina | 616/.001/41 |
| Soggetti | General Medicine Communication Documentation |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | <p>A Karger 'Publishing Highlights 1890–2015' title From the preface by M.M. Cummings, then Director National Library of Medicine: '... much needed. Communications in medicine have been recognised as a deficiency in health care delivery for many years, yet few have attempted to analyze the reasons for the problem and fewer persons have made the effort to provide a guide to its solution. ... [Harlem's] approach to the problem is quite pragmatic since it draws on his extensive experience as a medical educator, practitioner and editor. ... [His] views on speaking and writing deserve every student's and physician's careful attention.' What he presents is still very pertinent for the dialogue in medicine, even if there are now further, electronic means of (mis)communication.</p> |
