

1. Record Nr.	UNISALENTO991003242049707536
Autore	Campbell, Flake C.
Titolo	Manufacturing processes for advanced composites [e-book] / F. C. Campbell
Pubbl/distr/stampa	New York : Elsevier, 2004
ISBN	9781856174152 1856174158
Descrizione fisica	xii, 517 p. : ill. ; 24 cm
Disciplina	668.9
Soggetti	Polymeric composites Fibrous composites Manufacturing processes Electronic books.
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index
Nota di contenuto	Introduction to Composite Materials & Processes. -- Fibers and Reinforcements. -- Thermoset Resins. -- Cure Tooling. -- Ply Collation. -- Curing. -- Interaction of Chemical Composition and Processing on Laminate Quality. -- Adhesive Bonding and Integrally Co-cured Structures. -- Liquid Molding. -- Thermoplastic Composites. -- Commercial Processes. -- Assembly. -- Nondestructive Inspection and Repair
Sommario/riassunto	<p>&bull; One of very few books available to cover this subject area. &bull;</p> <p>A practical book with a wealth of detail. <P> This book covers the major manufacturing processes for polymer matrix composites with an emphasis on continuous fibre-reinforced composites. It covers the major fabrication processes in detail. <P> Very few books cover the details of fabrication and assembly processes for composites. This book is intended for the engineer who wants to learn more about composite processing: any one with some experience in composites should be able to read it. The author, who has 34 years experience in the aerospace industry, has intentionally left out mathematical models for processes so the book will be readable by the general engineer. <P> It differs from other books on composites manufacturing in</p>

focussing almost solely on manufacturing processes, while not attempting to cover materials, test methods, mechanical properties and other areas of composites
