Sommario/riassunto

This volume is the final output of a project started in 2013 on the occasion of the fortieth anniversary of the Scandinavian Section of the University of Milan. A group of scholars working on different European and non-European cultural and literary traditions come together here to discuss the relationships between their areas of study and the Nordic countries. The range of the contributions expands over time and space, from the Middle Ages to the present day, from Poland in the east to the United States in the west, across various European countries. Through various kinds of expertise and different perspectives, this intercultural discourse deals with diverse themes, including the perception of Nordic culture(s) by foreign writers as well as the image of other cultures in Scandinavian works. In particular, the literary and cultural interchange of models and ideas between the North and other areas is investigated in a number of essays devoted to numerous authors, including, among others, Klaus Böldl, Carmen de Burgos, Carlo Emilio Gadda, Gerhart Hauptmann, Henrik Ibsen, Stieg Larsson, Carl von Linné, Rainer Maria Rilke, J.D. Salinger, Henryk Sienkiewicz, Mme de Staël, August Strindberg, and Tomas Tranströmer.

Sommario/riassunto

The papers collected in this volume (including a comprehensive introduction) investigate semantic and discourse-related aspects of subordination and coordination, in particular the relationship between subordination/coordination at the sentence level and subordination/coordination - or hierarchical/non-hierarchical organization - at the discourse level. The contributions in part I are concerned with central theoretical questions; part II consists of corpus-based cross-linguistic studies of clause combining and discourse structure, involving at least two of the languages English, German, Dutch,

Nota di contenuto	Overview of Fractional Calculus Theory -- Fractional-order Electrical Circuits and Their Fundamental Laws -- Network Theorems of Fractional-order Electrical Circuits -- Time-domain Analysis of Fractional-order Dynamic Electrical Circuits -- Sinusoidal Steady-state Analysis of Fractional-order Electrical Circuits -- Fractional-order Three-phase Sinusoidal Electrical Circuits -- Analysis of Periodic Non-sinusoidal Steady-state Fractional-order Electrical Circuits -- Fractional-order Two-port Network -- Complex Frequency Domain Analysis of Fractional-order Electrical Circuits -- State Variable Analysis Method of Fractional-order Electrical Circuits -- Fractional-order Generalized Linear Electrical Circuits and Their Properties.
Sommario/riassunto	This book presents a concise and insightful view of the knowledge on fractional-order electrical circuits, which belongs to the subject of Electric Engineering and involves mathematics of fractional calculus. It offers an overview of fractional calculus and then describes and

analyzes the basic theories and properties of fractional-order elements and fractional-order electrical circuit composed of fractional-order elements. Therein, the fundamental theorems, time-domain analysis, steady-state analysis, complex frequency domain analysis and state variable analysis of fractional-order electrical circuit are included. The fractional-order two-port networks and generalized fractional-order linear electrical circuits are also mentioned. Therefore, this book provides readers with enough background and understanding to go deeper into the topic of fractional-order electrical circuit, so that it is useful as a textbook for courses related to fractional-order elements, fractional-order electrical circuits, etc. This book is intended for students without an extensive mathematical background and is suitable for advanced undergraduate and graduate students, engineers and researchers who focus on the fractional-order elements, electrical circuits and systems. .
