### Sommario/riassunto

This book constitutes the proceedings of the 13th International Conference on Integration of Artificial Intelligence and Operations Research Techniques in Constraint Programming for Combinatorial Optimization Problems, CPAIOR 2016, held in Banff, Canada, in May/June 2016. The 21 full papers presented together with 8 short papers were carefully reviewed and selected from 51 submissions. The conference brings together interested researchers from constraint programming, artificial intelligence, and operations research to present new techniques or applications in combinatorial optimization and provides an opportunity for researchers in one area to learn about techniques in the others, and to show how the integration of techniques from different fields can lead to interesting results on large and complex problems.

**Sommario/riassunto**

Bird argues that Jesus was attempting to achieve and enact the restoration of Israel, and in continuity with other strands of Jewish belief, Jesus conceived of the restoration of Israel as resulting in the salvation of the gentiles. Jesus' mission was Israel-centric, but he espoused a view of restoration that was indebted to certain strands of Israel's sacred traditions where the gentiles are implicit beneficiaries of Israel's salvation. Since this restoration was already being partially realized in Jesus' ministry, it was becoming possible for gentiles to begin sharing in Israel's salvation i
