Wertsch -- Vygotsky and culture / Michael Cole and Natalia Gajdamaschko -- Thought and word : the approaches of L.S. Vygotsky and G.G. Shpet / Vladimir P. Zinchenko -- The development of children's conceptual relation to the world, with focus on concept formation in preschool children's activity / Mariane Hedegaard -- Inside and outside the Zone of proximal development : an ecofunctional reading of Vygotsky / Pablo del Rio and Amelia Alvarez -- Pedagogy / Harry Daniels -- Sociocultural theory and education of children with special needs : from defectology to remedial pedagogy / Alex Kozulin and Boris Gindis -- Putting Vygotsky to work : the change laboratory as an application of double stimulation / Yrjo Engestrom.
Sommario/riassunto	L. S. Vygotsky was an early-twentieth-century Russian social theorist whose writing exerts a significant influence on the development of social theory in the early-twenty-first century. His non-deterministic,

non-reductionist account of the formation of mind provides current theoretical developments with a broadly drawn yet very powerful sketch of the ways in which humans shape and are shaped by social, cultural, and historical conditions. This dialectical conception of development insists on the importance of genetic or developmental analysis at several levels. The Cambridge Companion to Vygotsky is a comprehensive text that provides students, academics, and practitioners with a critical perspective on Vygotsky and his work.

2. Record Nr.	UNISALENTO991003327329707536
Titolo	Sociologia della salute / a cura di Massimiano Bucchi, Federico Neresini
Pubbl/distr/stampa	Roma : Carocci, 2001
ISBN	8843018140 :
