

1. Record Nr.	UNISALENTO991003409039707536
Autore	Eisenbud, David
Titolo	Minimal free resolutions over complete intersections [e-book] / David Eisenbud, Irena Peeva
ISBN	9783319264370 3319264370
Descrizione fisica	1 online resource (x, 107 pages)
Collana	Lecture notes in mathematics, 1617-9692 ; 2152
Classificazione	AMS 13D02
Altri autori (Persone)	Peeva, Irenaauthor
Disciplina	512.62
Soggetti	Syzygies (Mathematics) Resolvents (Mathematics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index
Sommario/riassunto	This book introduces a theory of higher matrix factorizations for regular sequences and uses it to describe the minimal free resolutions of high syzygy modules over complete intersections. Such resolutions have attracted attention ever since the elegant construction of the minimal free resolution of the residue field by Tate in 1957. The theory extends the theory of matrix factorizations of a non-zero divisor, initiated by Eisenbud in 1980, which yields a description of the eventual structure of minimal free resolutions over a hypersurface ring. Matrix factorizations have had many other uses in a wide range of mathematical fields, from singularity theory to mathematical physics
