

1. Record Nr.	UNISALENTO991003446719707536
Titolo	Aspectos jurídicos da aproximação dos países com vistas ao desenvolvimento : coalizões, integração regional e multilateralismo / coordenadores Romeu Felipe Bacellar Filho, Tatyana Scheila Friedrich
Pubbl/distr/stampa	Curitiba : Íthala, 2010
ISBN	9788561868161
Descrizione fisica	359 p.
Altri autori (Persone)	Friedrich, Tatyana Scheila Bacellar Filho, Romeu Felipeauthor
Disciplina	337.1
Soggetti	Paesi del MERCOSUL - Integrazione economica Relazioni economiche internazionali - America Latina
Lingua di pubblicazione	Non definito
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910790364603321
Autore	Hajos Gyorgy
Titolo	Hungarian problem book III : based on the Eotvos Competition, 1929-1943 / / compiled by G. Hajos, G. Neukomm, and J. Suranyi ; translated and edited by Andy Liu [[electronic resource]]
Pubbl/distr/stampa	Washington : , : Mathematical Association of America, , 2001
ISBN	0-88385-956-4
Descrizione fisica	1 online resource (xviii, 142 pages) : digital, PDF file(s)
Collana	Anneli Lax new mathematical library ; ; v. 42
Disciplina	510/.76
Soggetti	Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 02 Oct 2015).
Nota di contenuto	Eotvos mathematics competition problems -- Combinatorics problems -- Number theory problems -- Algebra problems -- Geometry problems, part I -- Geometry problems, part II.
Sommario/riassunto	The Eotvos Mathematics Competition is the oldest high school mathematics competition in the world, with a tradition dating back to 1894. In 1963, the first two of the Hungarian problem books were published in the New Mathematical Library by the MAA. This book is continuation of those volumes, taking the competition up through 1943. In the Hungarian Problem Book III, forty-five problems in all are presented in six chapters. Problems are classified into five groups: combinatorics, number theory, algebra, and geometry (in two parts). Multiple solutions are presented along with background material providing generalizations and remarks about the problems. This book is intended for beginners, although the experienced student will find much here. Beginners are encouraged to work the problems in each section and then to compare their results against the solutions presented in the book. They will find much material in each section to aid them in improving their problem-solving techniques.
