Book of 2016A Washington Post Best Memoir of 2016A TIME and
Entertainment Weekly Best Book of 2016 An illuminating debut memoir
of a woman in science; a moving portrait of a longtime friendship; and
a stunningly fresh look at plants that will forever change how you see
the natural world Acclaimed scientist Hope Jahren has built three
laboratories in which she's studied trees, flowers, seeds, and soil. Her
first book is a revelatory treatise on plant life-but it is also so much
more. Lab Girl is a book about work, love, and the mountains that can
be moved when those two things come together. It is told through
Jahren's remarkable stories: about her childhood in rural Minnesota
with an uncompromising mother and a father who encouraged hours of
play in his classroom's labs; about how she found a sanctuary in
science, and learned to perform lab work done "with both the heart and
the hands"; and about the inevitable disappointments, but also the
triumphs and exhilarating discoveries, of scientific work. Yet at the core
of this book is the story of a relationship Jahren forged with a brilliant,
wounded man named Bill, who becomes her lab partner and best
friend. Their sometimes rogue adventures in science take them from
the Midwest across the United States and back again, over the Atlantic
to the ever-light skies of the North Pole and to tropical Hawaii, where
she and her lab currently make their home. Jahren's probing look at
plants, her astonishing tenacity of spirit, and her acute insights on
nature enliven every page of this extraordinary book. Lab Girl opens
your eyes to the beautiful, sophisticated mechanisms within every leaf,
blade of grass, and
flower petal. Here is an eloquent demonstration of what can happen
when you find the stamina, passion, and sense of sacrifice needed to
make a life out of what you truly love, as you discover along the way
the person you were meant to be.
