1. **Record Nr.** UNISALENTO991003477409707536
   Autore O'Neill, Robert
   Titolo Kernel one : Students' book / Robert O'Neill ; with contributions from Alan McLean to the read and write sections
   Pubbl/distr/stampa London : Longman, 1978
   ISBN 058251925X
   Descrizione fisica 131 p. : ill. ; 25 cm

   Soggetti Lingua inglese
   Lingua di pubblicazione Inglese
   Formato Materiale a stampa
   Livello bibliografico Monografia

2. **Record Nr.** UNISALENTO991002928649707536
   Autore Shackley, Myra
   Titolo Archaeological sediments : a survey of analytical methods / Myra L. Shackley
   Pubbl/distr/stampa London ; Boston : Butter worths, 1975
   Descrizione fisica 159 p. : ill. ; 25 cm

   Disciplina 930.1028
   Soggetti Archeologia - Metodologia
   Stratigrafia
   Lingua di pubblicazione Inglese
   Formato Materiale a stampa
   Livello bibliografico Monografia

3.	Record Nr.	UNINA9910370043903321
	Autore	Dorpenyo Isidore Kafui
	Titolo	User Localization Strategies in the Face of Technological Breakdown : Biometric in Ghana's Elections / / by Isidore Kafui Dorpenyo
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2020
	ISBN	9783030263997 3030263991
	Edizione	[1st ed. 2020.]
	Descrizione fisica	1 online resource (258 pages)
	Disciplina	324.966705 338.9667
	Soggetti	Science - Social aspects Biotechnology Africa - Politics and government Technological innovations Science and Technology Studies African Politics Innovation and Technology Management
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Chapter 1: Recovering the Lost Voices of Users in Localization -- Chapter 2: Biometric Technology: the Savior of a Risky Electoral System -- Chapter 3: Decolonial Methodology as a Framework for Localization and Social Justice Study in Resource-Mismanaged Context -- Chapter 4: Stories of Users' Experiences -- Chapter 5: Linguistic Localization: Constructing Local/Global Knowledge of Biometric Technology -- Chapter 6: User-heuristic experience localization -- Chapter 7: Subversive localization -- Chapter 8: You are not who you say you are: Discriminations inherent in biometric design -- Chapter 9: Conclusion: participatory user localization.
	Sommario/riassunto	Dr. Dorpenyo is to be applauded for highlighting an often forgotten issue of how technology issues in the Global South can inhibit social justice for users who rely on technology to participate in the democratic process. This is a timely and important material that will

shape conversations on technology use in the fields of technical communication and rhetoric for a long time. -Godwin Agboka, Associate Professor of Technical Communication, University of Houston-Downtown, USA User Localization Strategies in the Face of Technological Breakdown is a nuanced, insightful text that will be useful to technical communication researchers interested in theories and methodologies of localization, biometrics, and cross-cultural technical communication. A much-needed perspective from an important community that can completely transform the ways in which technical communicators think about technology design in both local and global contexts. This book makes powerful interventions in current conversations about decolonizing technical communication through social justice work. -Laura Gonzales, Assistant Professor of Rhetoric and Writing Studies at The University of Texas at El Paso, USA, and author of Sites of Translation: What Multilinguals Can Teach Us About Digital Writing and Rhetoric Dorpenyo's work provides technical communicators with a deep and very privileged look into the fascinating world of technology transfer in Ghana. The story he tells of how biometrics were adapted by Ghana's election officials and voters is a case study for how to conduct analyses of "user localization strategies" for our field. -Tharon W. Howard, Professor of Professional Communication and Rhetoric and Director of the Usability Testing Facility, Clemson University, USA Dr. Dorpenyo's unique perspective and robust analysis of the adoption and use of biometric in Ghana's elections illustrates how users adapted this technology for their social, cultural, physical, and political contexts using linguistic, subversive, and user-heuristic localizations. This work, situated at the intersections of technical communication, civic engagement, social justice, user experience, and localization earns its significance by pointing out the importance of election technologies in non-western cultures and providing us with rhetorical localization strategies to consider within cultural technical communication. -Michelle F. Eble, Associate Professor of Technical and Professional Communication, East Carolina University, USA This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars. Localization, in this case, refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems. Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations. In User Localization Strategies in the Face of Technological Breakdown, Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns. By analyzing technical documents and interview transcripts, the author identifies and advances three user localization strategies: linguistic localization, subversive localization, and user-heuristic experience localization, and considers how biometric systems can become a tool of marginalization.
