A set of conceptual models of entrepreneurship education / Zhaocheng (Elly) Zeng, Benson Honig.
Sommario/riassunto	Volume 18 will focus on approaches to thinking about and creating the

start-up. Both theoretical and empirical manuscripts that consider all aspects of start-up planning, thinking and action will be considered. We also encourage practice-based research and manuscripts that explore cutting-edge pedagogical approaches. The papers in *Advances* reflect many state-of-the-art topics and approaches, and are written by leading researches in the field, making each volume an important source of information for virtually all entrepreneurship researchers. One of the distinctive competences of research volumes such as *Advances* is that the chapters can be published without page restrictions allowing for greater detail in the background, development, and implementation of ideas than is possible in journal articles. This provides authors with the opportunity to fully express their key ideas, provide much more complete support, and include relevant multi-page appendices. In effect, the *Advances* series provides authors the opportunity to publish an "article of record" of their major theoretical or empirical ideas, and see it disseminated to a wide audience.
