

1. Record Nr.	UNISALENTO991003532579707536
Titolo	Ontogeny and systematics / C. J. Humphries, editor
Pubbl/distr/stampa	London : British Museum (Natural History), 1988
ISBN	0565010638
Descrizione fisica	xi, 236 p. : ill. ; 24 cm
Altri autori (Persone)	Humphries, Christopher J.author
Altri autori (Convegni)	International Congress of Systematic and Evolutionary Biology <3rd : 1985 : Brighton, University of Sussex, England>
Disciplina	578
Soggetti	Biology-Classification - Congresses Evolution (Biology) - Congresses Ontogeny - Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Based on the proceedings of a symposium held in Brighton, Sussex, England, on July 5, 1985, at the Third International Congress of Systematic and Evolutionary Biology. Includes bibliographies and index Contents: The biological basis of homology / V. Louise Roth. Indirect and direct methods in systematics / P.H. Weston. The characteristics of ontogeny / A.G. Kluge. The systematic implications of pollen and spore ontogeny / S. Blackmore and P.R. Crane. Relations between ontogeny and phylogeny with reference to bryophytes / B. Mischler. Age-dependent evolution / H.M. André. Epigenetics / S. Lovtrup.
