Nota di contenuto	Prelims -- Introduction: Applied ethics in the fractured state -- Ethics, Roles, and Confucianism -- The Unique Perspective on Intention (Cetana), Ethics, Agency, and the Self in Buddhism -- Rawls, Reasonableness, and Conscientious Objection in Health Care -- The Other Side of Euthanasia: A Practice Perspective from Australia -- Natural Law, Non-Voluntary Euthanasia, and Public Policy -- When Health Workforce Governance Met Regulatory Capitalism: Australia's National Arrangements for Health Professional Registration and Accreditation -- Impact of the National Mutual Acceptance on Research Governance Practices in Victorian Public Healthcare Agencies -- Community Engagement and Professionalization: Emerging Tensions -- Index.
Sommario/riassunto	This book brings together the refereed proceedings of the 24th Annual Conference of the Australian Association of Professional and Applied Ethics (AAPAE) 'Applied Ethics in the Fractured State', held at the Institute for Public Policy and Governance, University of Technology Sydney in June 2017. The book is eclectic, with chapters on health regulation in Australia, Eastern ethical theorising (Confucianism; Buddhism), euthanasia and community engagement, all of which are

examined from the unique perspective that Research in Ethical Issues in Organizations affords its contributors.

Nota di contenuto	Introduction -- The miracle of amber -- Floral characteristics -- Chapter1. Burmese amber flowers -- Chapter2. Baltic amber flowers -- Chapter3. Dominican amber flowers -- Chapter4. Mexican amber flowers -- General conclusions -- References.
Sommario/riassunto	While much attention has been given to animal life in amber, the remains of a variety of plants, including angiosperm flowers, also exist

in fossilized resin. Presented here is a pictorial synopsis of 94 flowers that occur in four major amber deposits around the world. These deposits are from Burma (Myanmar), the Baltic area, the Dominican Republic and Mexico, and range in age from the mid-Cretaceous to the mid-Tertiary. The basic features of these flowers are presented and their relationship with existing plant lineages discussed. This work will be of interest to amber enthusiasts, plant taxonomists, plant morphologists, plant ecologists, plant evolutionists and plant paleontologists.
