Autore	Matzat, Bernd Heinrich
Titolo	Konstruktive Galoistheorie [e-book] / von Bernd Heinrich Matzat
Pubbl/distr/stampa	Berlin : Springer, 1987
ISBN	9783540184447 (online)
Descrizione fisica	1 online resource
Collana	Lecture Notes in Mathematics, 0075-8434 ; 1284
Classificazione	AMS 12-02 AMS 12F10
Disciplina	512.2
Soggetti	Field extensions Group theory
Lingua di pubblicazione	Tedesco
Formato	Software
Livello bibliografico	Monografia
Nota di contenuto	Das Umkehrproblem der Galoistheorie -- Fundamentalgruppen -- Klassenzahlen von Erzeugendensystemen -- Topologische Automorphismen -- Einbettungsprobleme Über Hilbertkörpern
Sommario/riassunto	This volume is based on a lecture course on constructive Galois Theory given in Karlsruhe by the author. The purpose of the course was to introduce students to the methods developed in the past few years for the realisation of finite groups as Galois groups over $\mathbb{Q}$ or over abelian number fields. Thus the book is addressed primarily to students with algebraic interests, as seminar material. Specialists also will find in it a multitude of examples of polynomials with special Galois groups, which can of course also be used for the usual algebra courses

## Sommario/riassunto

Fisheries in the Pacific: The Challenges of Governance and Sustainability is a multidisciplinary book, which examines various aspects of coastal and oceanic fisheries in Pacific waters. These interrelated fisheries sectors are critical for regional food security and also represent a reserve of food resources for the rest of the world. The introduction and eight chapters highlight that both these sectors raise major economic and ecological issues while revealing significant social changes, political asymmetries and alliances, geostrategic rationales, developments in legislation, customary dynamics, and conservation challenges. Through complementary approaches and interpretations of both quantitative and qualitative data, this book aims to contribute to a better understanding of the current situation of fisheries in the Pacific. It also responds to the compelling need to establish a constructive and ongoing dialogue on the matter between social scientists and environmental scientists, based in Europe and in the Pacific Islands, and between these experts and the various stakeholders and policy-making institutions involved in the Pacific region.
