Sommario/riassunto

Since his controversial Delivering and Dallying (published in 1988), Liu Xiaofeng has been considered the most influential among contemporary Chinese intellectuals interested in Christianity. Now for the first time this collection of Liu's essays, translated and commented by Prof. Leopold Leeb, enables the non-Chinese reader to get a comprehensive understanding of the ideas of this inspiring and erudite scholar. Liu Xiaofeng's Sino-Theology and the Philosophy of History , together with the other essays in this collection, provide a panoramic view of the situation of Christian studies in the Chinese context today. In his introduction, Leopold Leeb also presents several other scholars who have been of crucial importance in the dialogue between Chinese culture and Christianity in the last three decades.

Sommario/riassunto

Comprised of 10 surveys by leading scholars, this collection showcases
 the largest and fastest growing strands of research on market
 behaviour in experimental economics. * Covers topics such as asset
 markets, contests, environmental policy, frictions, general equilibrium,
 labour markets, multi-unit auctions, oligopoly markets, and prediction
 markets * Focuses on the literature that has helped economists best
 understand how markets operate * Assesses the impact of
 developments in theory, policy, and research methods
