Note generali	240 pages to tell the most eastern region of Italy through the spectacular images of numerous photographers. An unforgettable travel experience, from the Gargano and the Tremiti islands to the most extreme tip, that Salento bathed by two seas, from the lively ports on the Adriatic to the silent Ionian, passing through the cities of art – Lecce, Bari, Taranto – and the enchanting villages of the Itria Valley and the white Ostuni. Even the faces in Puglia, in which history seems engraved, can tell ancient stories such as those seen during the "days of passion", in which this land reveals itself in its most intimate aspect
