Descrizione fisica	1 online resource (xiv, 234 pages) : digital, PDF file(s)
Disciplina	336.3/435091724
Soggetti	Debts, Public - Developing countries International agencies
Lingua di pubblicazione	Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: the company you keep -- International institutions and sovereign risk -- The company you keep in comparative perspective -- The effects of Good Company -- When emerging markets join up with Bad Company -- How risk for core members changes on IO expansion -- Conclusion.
Sommario/riassunto	This book argues that investor risk in emerging markets hinges on the company a country keeps. When a country signs on to an economic agreement with states that are widely known to be stable, it looks less risky. Conversely, when a country joins a group with more unstable members, it looks more risky. Investors use the company a country keeps as a heuristic in evaluating that country's willingness to honor its sovereign debt obligations. This has important implications for the study of international cooperation as well as of sovereign risk and credibility at the domestic level.

Lynch -- Waste crimes in

italy: an empirical exploration of their geographic distribution / Daniela Andreatta -- Longitudinal methods for analyzing green crime / Michael A. Long, Paul B. Stretesky, and Kimberly L. Barrett -- No longer victorian children : understanding green victimization through an analysis of victim impact statements / Joshua Ozymy and Melissa Jarrell.

Sommario/riassunto

During the early development and throughout the short history of green/conservation criminology, limited attention has been directed toward quantitative analyses of relevant environmental crime, law and justice concerns. While recognizing the importance of establishing a theory and terminology in the early stages of development, this book redresses this imbalance. The work features contributions that undertake empirical quantitative studies of green/conservation crime and justice issues by both conservation and green criminologists. The collection highlights the shared concerns of these groups within important forms of ecological crime and victimization, and illustrates the ways in which these approaches can be undertaken quantitatively. It includes quantitative conservation/green criminological studies that represent the work of both well-established scholars in these fields, along with studies by scholars whose works are less well-known and who are also contributing to shaping this area of research. The book presents a valuable contribution to the areas of Green and Conservation Criminology. It will appeal to academics and students working in these areas.
