

1. Record Nr.	UNISALENTO991003858549707536
Autore	Naumann, Barbara
Titolo	Musikalisches ideen-instrument : das musikalische in poetik und sprachtheorie der Fruhromantik / Barbara Naumann
Pubbl/distr/stampa	Stuttgart : Metzler, 1990
ISBN	3476007200
Descrizione fisica	VII, 262 p. ; 21 cm
Disciplina	141.6094
Soggetti	Romanticismo e critica musicale Musica e letteratura Letteratura tedesca - Critica
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910506382203321
Titolo	Antibody glycosylation / / edited by Marija Pezer
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-76912-7
Descrizione fisica	1 online resource (585 pages)
Collana	Experientia Supplementum Ser ; ; v.112
Disciplina	571.967
Soggetti	Biochemical markers Pharmacology Immunology Enginyeria de proteïnes Enginyeria bioquímica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Foreword -- Contents -- Editor and Contributors -- Chapter 1: Micro-Heterogeneity of Antibody Molecules -- 1.1 Introduction -- 1.2 Disulfide Bond-Related Modifications -- 1.3 N- and C-Terminal Modifications -- 1.3.1 N-Terminal Modifications -- 1.3.2 C-Terminal Modifications -- 1.4 Chemical Modifications of Main-Chain Amino Acid Residues -- 1.4.1 Deamidation -- 1.4.2 Glycation -- 1.4.3 Oxidation -- 1.5 Aggregation -- 1.6 Glycosylation -- 1.6.1 IgG-Fc Oligosaccharide Chain -- 1.6.2 Fab Oligosaccharide Chain -- 1.7 Conclusion -- References -- Part I: Analytical Methods -- Chapter 2: Lectin and Liquid Chromatography-Based Methods for Immunoglobulin (G) Glycosylation Analysis -- 2.1 Introduction -- 2.1.1 Glycosylation -- 2.1.2 Immunoglobulins -- 2.2 Liquid Chromatography -- 2.2.1 Immunoglobulin Purification by Liquid Chromatography -- 2.2.1.1 Affinity Chromatography -- 2.2.1.2 Melon Gel Chromatography -- 2.2.1.3 Size-Exclusion Chromatography (SEC) -- 2.2.1.4 Ion-Exchange Chromatography (IEX) -- 2.2.2 N-Glycan Analysis by Liquid Chromatography -- 2.2.2.1 Glycan Release -- 2.2.2.2 Fluorescent Labeling Methods -- 2.2.2.3 Reducing Agent -- 2.2.2.4 Clean-Up

Strategies -- 2.2.2.5 Detection of Labeled Glycans with (U)HPLC --
 2.2.2.6 N-Glycan Sequencing by Exoglycosidases -- 2.2.3 O-Glycan
 Analysis by Liquid Chromatography -- 2.2.4 Liquid Chromatography
 Coupled to Mass Spectrometry -- 2.2.4.1 Proteolytic Cleavage --
 2.2.4.2 Glycopeptide and Glycan Enrichment -- 2.2.4.3 Glycopeptide
 and Glycan Analysis by LC-MS -- 2.2.4.4 Analysis of Ig Glycosylation
 on the Subunit and Whole Protein Level -- 2.3 Lectin Techniques --
 2.3.1 Lectin Chromatography -- 2.3.2 Lectin Microarrays -- 2.4
 Perspectives -- References -- Chapter 3: Mass Spectrometry-Based
 Methods for Immunoglobulin G N-Glycosylation Analysis -- 3.1 Basic
 Principles of Mass Spectrometry.
 3.1.1 Ionization -- 3.1.2 Gas-Phase Separation and Detection -- 3.1.3
 Tandem MS -- 3.2 Levels of IgG N-Glycosylation Analysis -- 3.3
 Sample Preparation for IgG Glycosylation Analysis -- 3.3.1 Protein A, G,
 and L Affinity Chromatography for IgG Enrichment from Biological
 Samples -- 3.3.1.1 Protein A -- 3.3.1.2 Protein G -- 3.3.1.3 Protein L
 -- 3.3.1.4 Recombinant Fusion Proteins and Alternative Scaffolds --
 3.3.2 Sample Preparation for Released IgG Glycan Analysis -- 3.3.2.1
 Chemical and Enzymatic Glycan Release -- 3.3.3 Fluorescent and
 Isotopic Glycan Labeling -- 3.3.4 Sample Preparation for Glycopeptide
 Mapping and Subclass-Specific IgG Fc Glycosylation Analysis -- 3.3.4.1
 Enzymatic Digestion -- 3.3.4.2 Stable Isotope Glycopeptide Labeling --
 3.3.4.3 Glycan and Glycopeptide Enrichment and Purification Strategies
 -- 3.4 Deciphering the IgG Glycan Structure -- 3.4.1 Fragmentation --
 3.4.2 Fragmentation Nomenclature -- 3.4.3 Fragmentation Candidates
 -- 3.4.3.1 Fragmentation of Glycopeptides -- 3.4.3.2 Fragmentation of
 Released Glycans -- 3.4.4 Ionization Polarity of MS Analysis -- 3.4.4.1
 Example of Positive Ion Mode Fragmentation -- 3.4.4.2 Example of
 Negative Ion Mode Fragmentation -- 3.4.5 Exoglycosidase Digestion
 Monitored by MS -- 3.5 Selected Approaches for IgG Glycosylation
 Analysis -- 3.5.1 MALDI-MS -- 3.5.1.1 Intact Proteins and
 Glycopeptides -- 3.5.1.2 Released N-Glycans -- 3.5.1.3 Sialic Acid
 Stability -- 3.5.1.4 Matrix Substances for MALDI-MS -- 3.5.1.5 MALDI-
 MS for High-Throughput and Quantitative Analysis -- 3.5.2 LC-MS for
 IgG Glycosylation Analysis -- 3.5.2.1 Coupling LC to MS for Enhanced
 Separation and Structural Characterization -- 3.5.2.2 HILIC-UHPLC-MS
 -- 3.5.2.3 RP-LC-MS -- 3.5.2.4 PGC for Enhanced Isomeric Glycan
 Separation -- 3.5.2.5 Anion Exchange LC-MS -- 3.5.2.6 Challenges of
 Miniaturization.
 3.5.3 Capillary Electrophoresis-Mass Spectrometry -- 3.6 Perspectives
 -- References -- Chapter 4: Capillary (Gel) Electrophoresis-Based
 Methods for Immunoglobulin (G) Glycosylation Analysis -- 4.1
 Historical Background -- 4.2 Background: Principles of Capillary (Gel)
 Electrophoresis (C(G)E) -- 4.3 Performance, Benefits, and Potentials of
 Capillary (Gel) Electrophoresis C(G)E -- 4.4 Data Analysis and
 Interpretation -- 4.5 Exoglycosidase Sequencing of Glycans -- 4.6
 Coupling Capillary Electrophoresis with Mass Spectrometry -- 4.7
 Latest Developments: Miniaturization of CE Systems-Microchip CE --
 4.8 Application of C(G)E for Immunoglobulin Analysis -- 4.9 Conclusion
 -- References -- Chapter 5: Automation of Immunoglobulin
 Glycosylation Analysis -- 5.1 Introduction -- 5.1.1 Biopharmaceutical
 Glycomics -- 5.1.2 Clinical Glycomics -- 5.1.3 Towards High-
 Throughput Glycomics -- 5.1.4 Robotics: The Ultimate High-
 Throughput Solution? -- 5.2 Automation of Glycomics Sample
 Preparation -- 5.2.1 Sample Origins and Protein Purification -- 5.2.1.1
 Serum and Plasma -- 5.2.1.2 Therapeutic Antibody Glycoproteins --
 5.2.2 Preparing Glycans for Analysis: Glycan Release, Derivatization and
 Clean-Up -- 5.2.2.1 Plasma and Serum -- Automated Methods for N-

Glycan Preparation Employing Anomeric Fluorescent Labeling Strategies -- Automated Methods for N-Glycan Preparation Employing Permethylatization Derivatization Strategies -- 5.2.2.2 Therapeutic Antibody Glycoproteins -- Automated Methods for N-Glycan Preparation Employing Anomeric Fluorescent Labeling Strategies -- Automated Methods for N-Glycan Preparation Employing Permethylatization Derivatization Strategies -- 5.2.3 Automated Methods for Glycopeptide Preparation -- 5.3 Commentary -- 5.4 Future Perspectives -- 5.5 Conclusions -- References -- Chapter 6: Bioinformatics in Immunoglobulin Glycosylation Analysis -- 6.1 Introduction. 6.2 Glycomic Data Collection and Processing -- 6.2.1 Reference Databases -- 6.2.2 Identification and Quantification Software Tools -- 6.3 Glycoproteomics Data Collection and Processing -- 6.3.1 Reference Databases -- 6.3.2 Identification Software Tools -- 6.3.3 Quantification Software Tools -- 6.4 Data Integration with Other Omics -- 6.5 Practical Examples -- 6.5.1 Glycomic Data Processing -- 6.5.1.1 Software Required -- 6.5.1.2 Glycan Composition Determination -- 6.5.1.3 Annotation of MS and MS/MS Glycomics Spectra -- 6.5.1.4 Convert Raw Mass Spectrometry Data to mzXML -- 6.5.1.5 Skyline for Glycomics Quantitation -- 6.5.1.6 Setting Up Transition List -- 6.5.2 Glycopeptide Data Processing for Enriched Immunoglobulins -- 6.5.2.1 Software Required -- 6.5.2.2 Glycosylation Site Identification Based on MS2 -- 6.5.2.3 Glycoform Identification Based on MS1 -- 6.5.2.4 Targeted Glycopeptide Quantification -- 6.5.3 Visualizing Profiles -- 6.5.3.1 Structural Dependencies Brought Out by GlyConnect Compozitor -- 6.5.3.2 Comparing Profiles with Glynsight -- 6.6 Conclusion -- References -- Part II: Biosynthesis and Regulation -- Chapter 7: N-Glycan Biosynthesis: Basic Principles and Factors Affecting Its Outcome -- 7.1 Introduction -- 7.2 Biosynthesis of N-Glycans in the Endoplasmic Reticulum -- 7.2.1 Building Blocks for N-Glycan Synthesis -- 7.2.2 Precursor Synthesis and Its Attachment to Nascent Polypeptide Chains -- 7.2.3 N-Glycan Processing in the ER and Quality Control -- 7.3 N-Glycan Processing in the Golgi Apparatus -- 7.3.1 N-Glycosylation of Immunoglobulins -- 7.4 Golgi Microenvironment Is Important for Normal Processing and Maturation of N-Glycans -- 7.4.1 Golgi pH Homeostasis -- 7.4.2 Golgi Ion Homeostasis -- 7.4.3 Golgi Redox State -- 7.5 Concluding Remarks -- References -- Chapter 8: Genetic Regulation of Immunoglobulin G Glycosylation. 8.1 Introduction -- 8.2 Heritability of the Human IgG N-Glycome -- 8.3 Linkage Studies of Mouse N-glycome -- 8.4 Genome-Wide Association Studies of Human N-Glycome -- 8.4.1 Genomic Loci Associated with IgG N-Glycosylation -- 8.4.1.1 Chromosome 1 -- 8.4.1.2 Chromosome 3 -- 8.4.1.3 Chromosome 5 -- 8.4.1.4 Chromosome 6 -- 8.4.1.5 Chromosome 7 -- 8.4.1.6 Chromosome 9 -- 8.4.1.7 Chromosome 11 -- 8.4.1.8 Chromosome 14 -- 8.4.1.9 Chromosome 17 -- 8.4.1.10 Chromosome 21 -- 8.4.1.11 Chromosome 22 -- 8.4.2 Suggestive Associations -- 8.4.3 Functional Network of Loci Associated with IgG Glycosylation -- 8.5 Pleiotropy with Complex Traits and Diseases -- 8.6 Conclusions -- References -- Chapter 9: Epigenetics of Immunoglobulin G Glycosylation -- 9.1 Introduction -- 9.2 Regulation of Glycosyltransferases by Transcription Factors -- 9.3 Epigenetic Regulation of IgG Glycosylation -- 9.4 The Role of miRNAs in Protein N-Glycosylation -- 9.5 Conclusions -- References -- Chapter 10: Immunoglobulin G Glycosylation Changes in Aging and Other Inflammatory Conditions -- 10.1 Premise -- 10.2 IgG Glycosylation -- 10.3 Changes in IgG Asn297 Glycans Associated with Inflammatory Diseases -- 10.4 IgG Glycosylation as a Predictor of Disease Onset,

Progression, and Therapy Response -- 10.4.1 Prediction of Disease Onset -- 10.4.2 Prediction of Progression and Therapy Response -- 10.5 IgG Glycosylation in Aging -- 10.6 The Inflammaging Is a Link Between Aging and Inflammation -- 10.7 How Altered IgG Glycosylation Drives Inflammation -- 10.7.1 Activation of Complement Through the Lectin or the Classical Pathways -- 10.7.2 Binding to Fc Receptors -- 10.7.3 Binding on Lectin Receptors of Antigen-Presenting Cells: Role in the Intravenous Administration of High Doses IgG (IVIG) -- 10.7.4 Anti IgG Autoantibodies -- 10.8 Molecular Bases of N-Glycosylation Changes -- 10.9 Conclusions. References.

3.	Record Nr.	UNISANNIOUFI0365974	
	Autore	Mulazzani, Marcella	
	Titolo	1: Principi generali di gestione, di organizzazione e di rilevazione; lo Stato; lineamenti economico-aziendali / Marcella Mulazzani	
	Pubbl/distr/stampa	Padova, : CEDAM, 2001	
	ISBN	8813232756	
	Descrizione fisica	XVII, 365 p. ; 24 cm.
