1. Record Nr.   UNISALENTO991003907799707536

   Autore   Calvaruso, Giovanni

   Titolo   Pseudo-Riemannian homogeneous structures / Giovanni Calvaruso, Marco Castrillón López

ISBN	9783030181543
Descrizione fisica	xv, 238 p. ; 25 cm
Collana	Developments in Mathematics ; 59
Classificazione	LC QA649
Altri autori (Persone)	Castrillón López, Marcoauthor
Disciplina	516.3/62
Soggetti	Semi-Riemannian geometry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index
Sommario/riassunto	This book provides an up-to-date presentation of homogeneous pseudo-Riemannian structures, an essential tool in the study of pseudo-Riemannian homogeneous spaces. Benefiting from large symmetry groups, these spaces are of high interest in Geometry and Theoretical Physics. Since the seminal book by Tricerri and Vanhecke, the theory of homogeneous structures has been considerably developed and many applications have been found. The present work covers a gap in the literature of more than 35 years, presenting the latest contributions to the field in a modern geometric approach, with special focus on manifolds equipped with pseudo-Riemannian metrics. This will be of interest to researchers working in areas of mathematics where homogeneous spaces play an important role, such as Differential Geometry, Global Analysis, General Relativity, and Particle Physics
