Sommario/riassunto	""Madeline is a 15-year-old girl with abdominal pain and headaches that occur most days of the week. Because of her pain, she has missed

99 days of school this year and is no longer able to play volleyball. Her parents have taken her to see a number of specialists and she has tried many different medications but she has not experienced any improvement in her pain..."" Chronic pain is a significant health problem for many children and adolescents, with studies suggesting that as many as 40% of children suffer from chronic pain. Unfortunately, many families cannot get the help they need because
