Sommario/riassunto

Black holes exist in galactic nuclei and in some X-ray binaries found in our own galaxy and the large Magellanic Cloud. This volume focuses on astrophysical high-energy emission processes around black holes, and the development of theoretical frameworks for interesting observational results.   
*Contents:*

- Black Hole Observations
- Accretion Disk/Formation of Jets
- Energy Extraction from Rotating Black Holes
- Supernova and Gamma Ray Bursts
- Black Hole Astrophysics

  
*Readership:* Graduate students, post-docs and academics in astrophysic

Sommario/riassunto	After World War II, France embarked on a project of modernization, which included the development of the modern mass home. At Home in Postwar France examines key groups of actors - state officials, architects, sociologists and tastemakers - arguing that modernizers

looked to the home as a site for social engineering and nation-building; designers and advocates of the modern home contributed to the democratization of French society; and the French home of the Trente Glorieuses, as it was built and inhabited, was a hybrid product of architects', planners', and residents' understandings of moder
