1. Record Nr. UNISALENTO991004265227607536

Autore	Natário, José
Titolo	An Introduction to mathematical relativity / José Natário
Pubbl/distr/stampa	Cham, Switzerland : Springer, c2021
ISBN	9783030656850
Descrizione fisica	viii, 186 p. : ill. ; 24 cm
Collana	Latin American mathematics series. UFSCar subseries, 2524-6755
Classificazione	LC QC173.6 53.1.52 AMS 53-XX
Disciplina	530.11
Soggetti	General relativity (Physics) - Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index
Nota di contenuto	Preliminaries -- Exact Solutions -- Causality -- Singularity Theorems -- Cauchy Problems -- Mass in general relativity -- Black Holes -- Appendix: Mathematical Concepts for Physicists
Sommario/riassunto	This concise textbook introduces the reader to advanced mathematical aspects of general relativity, covering topics like Penrose diagrams, causality theory, singularity theorems, the Cauchy problem for the Einstein equations, the positive mass theorem, and the laws of black hole thermodynamics. It emerged from lecture notes originally conceived for a one-semester course in Mathematical Relativity which has been taught at the Instituto Superior Tecnico (University of Lisbon, Portugal) since 2010 to Masters and Doctorate students in Mathematics and Physics. Mostly self-contained, and mathematically rigorous, this book can be appealing to graduate students in Mathematics or Physics seeking specialization in general relativity, geometry or partial differential equations. Prerequisites include proficiency in differential geometry and the basic principles of relativity. Readers who are familiar with special relativity and have taken a course either in Riemannian geometry (for students of Mathematics) or in general relativity (for those in Physics) can benefit from this book
