Record Nr.	UNINA9910455549603321
Autore	Murray Steven N (Steven Nelson), <1944->
Titolo	Monitoring rocky shores [[electronic resource] /] / Steven N. Murray, Richard F. Ambrose, Megan N. Dethier
Pubbl/distr/stampa	Berkeley, : University of California Press, c2006
ISBN	1-282-35901-0 9786612359019 0-520-93271-4
Descrizione fisica	1 online resource (242 p.)
Altri autori (Persone)	AmbroseRichard F (Richard Francis) DethierMegan Nichols
Disciplina	577.69/9
Soggetti	Intertidal ecology - Research - Methodology Environmental monitoring - Methodology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Frontmatter -- Contents -- List of figures -- List of tables -- Preface -- Acknowledgments -- 1 . Designing Rocky Intertidal Monitoring and Impact Field Studies: A Brief Overview -- 2. Site Classification and Selection -- 3. Biological Units -- 4. Sampling Design -- 5. Transects, Quadrats, and Other Sampling Units -- 6. Quantifying Abundance: Density and Cover -- 7. Quantifying Abundance: Biomass -- 8. Individual-Based Parameters: Age Determination, Growth Rates, Size Structure, and Reproduction -- Subject index -- Taxonomic index -- About the authors
Sommario/riassunto	Monitoring changes in the intertidal zone of rocky shores has never been more critical. This sensitive habitat at the interface of land and ocean may well be the marine equivalent of the canary in a coal mine as we advance into an era of global climate change. This handbook describes effective methods and procedures for monitoring the ecological and environmental status of these areas. Written by three collaborating authors with extensive field experience, it provides critical discussions and evaluation of the various sampling techniques and field procedures for studies of intertidal macroinvertebrates,

seaweeds, and seagrasses. Rather than prescribing standard protocols or procedures, the authors break down the decision-making process into various elements so investigators can become aware of the advantages and disadvantages of choosing a particular method or approach. Chapters discuss topics such as site selection, field sampling layouts and designs, selection of sampling units, nondestructive and destructive methods of quantifying abundance, and methods for measuring age, growth rates, size, structure, and reproductive condition.
