Titolo	Advances and New Trends in Environmental Informatics : ICT for Sustainable Solutions // edited by Rüdiger Schaldach, Karl-Heinz Simon, Jens Weismüller, Volker Wohlgemuth		
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020		
ISBN	3-030-30862-6		
Edizione	[1st ed. 2020.]		
Descrizione fisica	1 online resource (viii, 178 pages) : illustrations		
Collana	Progress in IS, , 2196-8713		
Disciplina	333.714		
Soggetti	Computer networks Business information services Environmental management Renewable energy sources Information technology - Management Sustainability Computer Communication Networks Business Information Systems Environmental Management Renewable Energy Business IT Infrastructure		

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This book is an outcome of the 33rd International Conference EnviroInfo 2019, held at the University of Kassel, Germany. It presents a selection of papers that describe innovative scientific approaches and ongoing research in environmental informatics and the emerging field of computational sustainability. The respective articles cover a broad range of scientific aspects including advances in core technologies such as earth observation, environmental modelling, big data and machine learning, as well as applications of ICT solutions intended to support societal transformation processes toward the more sustainable management of resource use, transportation and the energy supply. Given its scope, the book is essential reading for scientists, experts and students in these fields of research.</p>
