Sommario/riassunto

Filtered through the lens of the North American and European media, the Caribbean appears to be a series of idyllic landscapes-sanctuaries designed for sailing, diving, and basking in the sun on endless white sandy beaches. Conservation literature paints a similarly enticing portrait, describing the region as a habitat for endangered coral reefs and their denizens, parrots, butterflies, turtles, snails, and a myriad of plant species. In both versions, the image of the exotic landscape overshadows the rich island cultures that are both linguistically and politically diverse, but trapped in a global economy that offers few options for development. Popular depictions also overlook the reality that the region is fraught with environmental problems, including water and air pollution, solid waste mismanagement, destruction of ecosystems, deforestation, and the transition from agriculture to ranching. Bringing together ten essays by social scientists and activists, *Beyond Sun and Sand* provides the most comprehensive exploration to date of the range of environmental issues facing the region and the social movements that have developed to deal with them. The authors consider the role that global and regional political economies play in this process and provide valuable insight into Caribbean environmentalism. Many of the essays by prominent Caribbean analysts are made available for the first time in English.

2. Record Nr.	UNINA9910785520803321
Autore	Henderson Anthony <1976->
Titolo	Representations of Lie algebras : an introduction through gl <sub>n</sub> / / Anthony Henderson, School of Mathematics and Statistics, University of Sydney [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2012
ISBN	1-139-56498-6 1-316-09056-6 1-139-23612-1 1-283-57524-8 1-139-55145-0 9786613887696 1-139-55641-X 1-139-55271-6 1-139-55020-9 1-139-55516-2
Descrizione fisica	1 online resource (ix, 156 pages) : digital, PDF file(s)
Collana	Australian Mathematical Society lecture series ; ; 22
Classificazione	MAT002000
Disciplina	512/.482
Soggetti	Representations of Lie algebras
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: 1. Motivation: representations of Lie groups; 2. Definition of a Lie algebra; 3. Basic structure of a Lie algebra; 4. Modules over a Lie algebra; 5. The theory of SL <sub>2</sub> -modules; 6. General theory of modules; 7. Integral GL <sub>n</sub> -modules; 8. Guide to further reading; Appendix: solutions to the exercises; Bibliography; Index.
Sommario/riassunto	This bold and refreshing approach to Lie algebras assumes only modest prerequisites (linear algebra up to the Jordan canonical form and a basic familiarity with groups and rings), yet it reaches a major result in representation theory: the highest-weight classification of irreducible modules of the general linear Lie algebra. The author's exposition is focused on this goal rather than aiming at the widest

generality and emphasis is placed on explicit calculations with bases and matrices. The book begins with a motivating chapter explaining the context and relevance of Lie algebras and their representations and concludes with a guide to further reading. Numerous examples and exercises with full solutions are included. Based on the author's own introductory course on Lie algebras, this book has been thoroughly road-tested by advanced undergraduate and beginning graduate students and it is also suited to individual readers wanting an introduction to this important area of mathematics.
