

1. Record Nr.	UNISOBSOBE00045050
Autore	Martín_Gaite, Carmen
Titolo	Nubosidad variable / Carmen Martín Gaite
Pubbl/distr/stampa	Barcelona : Anagrama, 1992
ISBN	843390938X
Descrizione fisica	391 p. ; 22 cm
Collana	Narrativas Hispánicas ; 128
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910877329403321
Autore	Spencer B. E
Titolo	Molluscan shellfish farming / / by B.E. Spencer
Pubbl/distr/stampa	Oxford, : Fishing News Books, 2002
ISBN	1-280-21380-9 9786610213801 0-470-79282-5 0-470-99570-X 1-4051-4744-X
Descrizione fisica	1 online resource (294 p.)
Disciplina	639.4
Soggetti	Shellfish culture - Great Britain Shellfish fisheries - Great Britain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Molluscan Shellfish Farming; Contents; Acknowledgements; Introduction; 1 Bivalve cultivation in the UK: structuring influences; 2

General biology of bivalves with respect to cultivation; 3 Hatchery culture of bivalve larvae and juveniles; 4 Cultivation of hatchery-reared oysters in the sea; 5 Clam cultivation; 6 Oyster cultivation; 7 Mussel cultivation; 8 Scallop cultivation; 9 Abalone cultivation; 10 Bivalve predators and their control; 11 Criteria for selecting a site for bivalve cultivation; 12 Processing live bivalves for consumption; Glossary; Index

Sommario/riassunto

As the world's population and the demand for seafood increase, the production of seafood from aquaculture has also seen massive increase and is set to continue. With wild stocks of many molluscan species depleted, aquaculture is firmly recognised as the means now, and for the future, of bridging the gap between the supply and demand of seafood. This important book covers the general biology of bivalves, hatchery culture methods and specific and comprehensive details of the cultivation of many commercially important species, including clams, oysters, mussels, scallops and abalone.
