1. Record Nr. UNISA990000989930203316

Autore LONDON, Rose

Titolo Cinema of mystery / by Rose London

Pubbl/distr/stampa Firenze: Lorrimer, copyr. 1985

ISBN 0-85647-106-2

Descrizione fisica 111 p.; 22 cm

Disciplina 791.43616

Soggetti Film dell'orrore

Collocazione XIII.2. 1475(XVI F 73)

Lingua di pubblicazione Italiano

Formato Materiale a stampa

Livello bibliografico Monografia

2. Record Nr. UNISOBSOBE00069710

Autore Pérez Navarro, José

Titolo Nivel 2 : modulos E-G / José Pérez Navarro, Carla Polettini

Pubbl/distr/stampa Bologna, : Zanichelli, 2003

ISBN 9788808208941

Descrizione fisica 1 v.(paginazione varia): ill.; 27 cm

Altri autori (Persone) Polettini, Carla

Lingua di pubblicazione Italiano

Spagnolo

Formato Materiale a stampa

Livello bibliografico Monografia

Record Nr. UNINA9910346757403321 Autore Amiram Ariel Titolo Apoptotic Cell Clearance in Health and Disease Pubbl/distr/stampa Frontiers Media SA, 2018 Descrizione fisica 1 online resource (294 p.) Collana Frontiers Research Topics Soggetti Medicine Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Clearance of apoptotic cells is essential for proper development, Sommario/riassunto homeostasis and termination of immune responses in multicellular organisms. Thus, cellular and molecular players taking part in the sequential events of this process are of great interest. Research in the last 20 years has indicated that specific ligands and receptors take part in the attraction of immune cells toward apoptotic targets and in the interactions between apoptotic cells and professional as well as nonprofessional phagocytes that engulf them. Moreover, phagocytosis of apoptotic cells (efferocytosis) leads to significant phenotypic changes in the engulfing cells suggesting that it is a major fate-determining event for phagocytes. Particularly, efferocytosis has an important impact on the inflammation-resolution axis as well as embryonic development and tissue morphogenesis. Deficiencies in these processes can result in health threats, such as autoimmunity, atherosclerosis, bone loss, obesity, infertility, neurodegeneration, fibrosis and cancer. This eBook brings together 24 original research and review manuscripts that cover

various aspects of apoptotic cell removal during normal development

and homeostasis as well as in tumorigenesis and regenerative

processes following injury.
